2. COMPANY OVERVIEW

Lujasu Investment Company Limited was established with the vision of harnessing Tanzania's vast mineral wealth while adhering to the highest standards of operational excellence and corporate social responsibility. Our operations span the entire value chain, from initial geological surveys and exploration to efficient extraction, processing, and global distribution of high-demand minerals.

Vision and Mission

Vision: To be the most trusted and sustainable mineral investment company in East Africa, recognized for our ethical practices, operational excellence, and significant contribution to regional development.

Mission: To responsibly explore, extract, and trade a diverse portfolio of minerals, delivering exceptional value to our stakeholders, empowering local communities, and ensuring environmental stewardship.

4. CORE BUSINESS ACTIVITIES

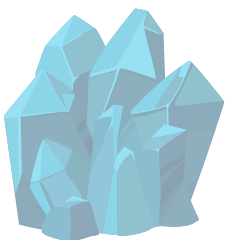

Lujasu Investment Company Limited is actively involved in the following key areas:

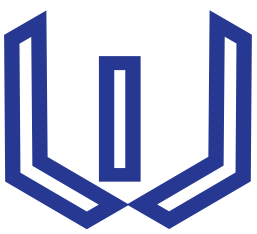

Exploration: Conducting comprehensive geological surveys and prospecting to identify commercially viable mineral deposits. This involves advanced mapping, sampling, and analytical techniques.

Extraction: Employing modern and efficient mining techniques for the safe and sustainable extraction of minerals. Our methods prioritize environmental protection and worker safety.

Processing: Initial processing and beneficiation of raw minerals to enhance their purity and market value, preparing them for domestic and international markets.

Trading: Facilitating the sale and distribution of our extracted minerals to various industrial clients and global markets, ensuring competitive pricing and reliable supply chains.

5. MINERAL PORTFOLIO

Lujasu Investment Company Limited deals with a comprehensive range of high-value minerals critical for various industries worldwide:

Gold: Precious metal, primarily used in jewelry, investment, and electronics.

Copper: Essential industrial metal, widely used in electrical wiring, construction, and electronics.

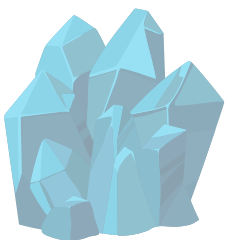

Lithium: Critical component for rechargeable batteries, vital for electric vehicles and portable electronics.

Coltan (Columbite-Tantalite): Source of Niobium and Tantalum, crucial for capacitors in electronics (mobile phones, laptops) and high-temperature alloys.

Tantalite: A key ore for Tantalum, used in electronic components, chemical processing equipment, and aerospace.

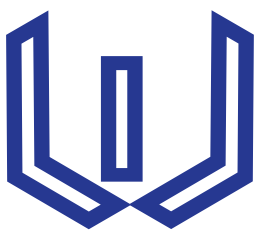

Coal: Primary energy source for electricity generation and industrial processes.

Manganese: Essential alloy in steel production, also used in batteries and chemicals.
